Subject Index of Volume 157

Adiabatic shear bands
  on the measurement of local strain and temperature during the formation of adiabatic shear bands, 195
Allotriomorphic ferrite
  carbide precipitation and the nucleation of allotriomorphic ferrite in a Fe–W–C steel, 101
Alloys
  a study of cavity nucleation during superplastic deformation of high strength aluminium alloy 7475, 37
  double mechanical alloying of Al–5wt.%Fe–4wt.%Mn, 79
  fracture toughness of W heavy metal alloys, 151
  hysteresis loop shape in fatigue of Cu–Zn alloys, 169
  strain concentration at grain boundaries in AlMgSi alloys, 1
  the effect of trace elements on the creep behaviour of a Ni–Cr-base alloy, 63
Aluminium
  a study of cavity nucleation during superplastic deformation of high strength aluminium alloy 7475, 37
  calculation of creep and stress–strain behaviour in aluminium, 15
  double mechanical alloying of Al–5wt.%Fe–4wt.%Mn, 79
  martensite precursor observations using thermal expansion: Ni–Al, 225
  planar slip and deformation-induced strain instabilities in cyclically deformed Al–Li single crystals, 161
  sliding behavior of aluminum, 131
  strain concentration at grain boundaries in AlMgSi alloys, 1
Analytical electron spectroscopy
  a study of precipitates and insolubles in a nickel–iron-base superalloy by analytical electron microscopy, 89
Annealing
  the role of annealing twin boundaries in the cyclic deformation of f.c.c. materials, 21
Austenite
  mechanical properties of sintered austenitic stainless steel—effect of silicon addition, 145
α-Brass
  burst phenomena in fatigue of 70–30 alpha-brass at room temperature, 181
  effects of zinc content on the processing map for hot working of α brass, 43

Bainite
  the effects of rolling processes on the microstructure and mechanical properties of ultra low carbon bainitic steels, 29
Boron
  effects of purification on the glass forming ability and thermostability of Ni–B–Si metallic glass, 211
  flash annealing nanocrystallization of Fe–Si–B-based glasses, 107
  precipitation phenomena in B_4 reinforced magnesium based composite, 53
Burst phenomena
  burst phenomena in fatigue of 70–30 alpha-brass at room temperature, 181

Carbon
  carbide precipitation and the nucleation of allotriomorphic ferrite in a Fe–W–C steel, 101
  precipitation phenomena in B_4 reinforced magnesium based composite, 53
  the effects of rolling processes on the microstructure and mechanical properties of ultra low carbon bainitic steels, 29
Cavity nucleation
  a study of cavity nucleation during superplastic deformation of high strength aluminium alloy 7475, 37
Chromium
  the effect of trace elements on the creep behaviour of a Ni–Cr-base alloy, 63
Composites
  precipitation phenomena in B_4 reinforced magnesium based composite, 53
Copper
  hysteresis loop shape in fatigue of Cu–Zn alloys, 169
Creep
  calculation of creep and stress–strain behaviour in aluminium, 15
  the effect of trace elements on the creep behaviour of a Ni–Cr-base alloy, 63
Cyclic deformation
  the role of annealing twin boundaries in the cyclic deformation of f.c.c. materials, 21

Deformation
  a study of cavity nucleation during superplastic deformation of high strength aluminium alloy 7475, 37
  planar slip and deformation-induced strain instabilities in cyclically deformed Al–Li single crystals, 161

Equiaxial structures
  permeabilities for flow of interdendritic liquid in equiaxial structures, 113

F.c.c. materials
  the role of annealing twin boundaries in the cyclic deformation of f.c.c. materials, 21
Fatigue
  burst phenomena in fatigue of 70–30 alpha-brass at room temperature, 181
  hysteresis loop shape in fatigue of Cu–Zn alloys, 169
Flash annealing
  flash annealing nanocrystallization of Fe–Si–B-based glasses, 107
Fracture toughness
  fracture toughness of W heavy metal alloys, 151

Glass
  effects of purification on the glass forming ability and thermostability of Ni–B–Si metallic glass, 211
Glass forming
  effects of purification on the glass forming ability and thermostability of Ni–B–Si metallic glass, 211

Glasses
flash annealing nanocrystallization of Fe–Si–B-based glasses, 107
Grain boundaries
strain concentration at grain boundaries in AlMgSi alloys, 1

Hot isostatic pressing
experimental size ratio and compositional effects on the packing and hot isostatic pressing of spherical powders, 217
Hot working
effects of zinc content on the processing map for hot working of α brass, 43
Hysteresis loops
hysteresis loop shape in fatigue of Cu–Zn alloys, 169

Insolubility
a study of precipitates and insolubles in a nickel–iron-base superalloy by analytical electron microscopy, 89
Interdendritic liquids
permeabilities for flow of interdendritic liquid in equiaxial structures, 113
Iron
a study of precipitates and insolubles in a nickel–iron-base superalloy by analytical electron microscopy, 89
carbon precipitation and the nucleation of allotriomorphic ferrite in a Fe–W–C steel, 101
double mechanical alloying of Al–5wt.%Fe–4wt.%Mn, 79
flash annealing nanocrystallization of Fe–Si–B-based glasses, 107

Lamellar eutectics
dynamics of spacing selection of a lamellar eutectic during directional solidification, 73
Lithium
planar slip and deformation-induced strain instabilities in cyclically deformed Al–Li single crystals, 161

Magnesium
precipitation phenomena in B_4 reinforced magnesium based composite, 53
strain concentration at grain boundaries in AlMgSi alloys, 1
Manganese
double mechanical alloying of Al–5wt.%Fe–4wt.%Mn, 79
Martensite
martensite precursor observations using thermal expansion: Ni–Al, 225
Mechanical alloying
double mechanical alloying of Al–5wt.%Fe–4wt.%Mn, 79
Mechanical properties
the effects of rolling processes on the microstructure and mechanical properties of ultra low carbon bainitic steels, 29
Metal powders
coating of non-oxide ceramics by interaction with metal powders, 233
Microstructure
oxidation of sintered silicon nitride: I. Phase composition and microstructure, 125
the effects of rolling processes on the microstructure and mechanical properties of ultra low carbon bainitic steels, 29

Nanocrystallization
flash annealing nanocrystallization of Fe–Si–B-based glasses, 107
Nickel
a study of precipitates and insolubles in a nickel–iron-base superalloy by analytical electron microscopy, 89
effects of purification on the glass forming ability and thermostability of Ni–B–Si metallic glass, 211
martensite precursor observations using thermal expansion: Ni–Al, 225
the effect of trace elements on the creep behaviour of a Ni–Cr-base alloy, 63
Nitrogen
oxidation of sintered silicon nitride: I. Phase composition and microstructure, 125
Non-oxide ceramics
coating of non-oxide ceramics by interaction with metal powders, 233

Oxidation
oxidation of sintered silicon nitride: I. Phase composition and microstructure, 125

Permeability
permeabilities for flow of interdendritic liquid in equiaxial structures, 113
Phase composition
oxidation of sintered silicon nitride: I. Phase composition and microstructure, 125
Planar slip
planar slip and deformation-induced strain instabilities in cyclically deformed Al–Li single crystals, 161
Precipitation
a study of precipitates and insolubles in a nickel–iron-base superalloy by analytical electron microscopy, 89
carbide precipitation and the nucleation of allotriomorphic ferrite in a Fe–W–C steel, 101
precipitation phenomena in B_4 reinforced magnesium based composite, 53

Rolling processes
the effects of rolling processes on the microstructure and mechanical properties of ultra low carbon bainitic steels, 29

Silicon
effects of purification on the glass forming ability and thermostability of Ni–B–Si metallic glass, 211
flash annealing nanocrystallization of Fe–Si–B-based glasses, 107
mechanical properties of sintered austenitic stainless steel—effect of silicon addition, 145
oxidation of sintered silicon nitride: I. Phase composition and microstructure, 125
strain concentration at grain boundaries in AlMgSi alloys, 1
Single crystals
planar slip and deformation-induced strain instabilities in cyclically deformed Al–Li single crystals, 161
Sintering
mechanical properties of sintered austenitic stainless steel—effect of silicon addition, 145
oxidation of sintered silicon nitride: I. Phase composition and microstructure, 125
Sliding
sliding behavior of aluminum, 131
Solidification
dynamics of spacing selection of a lamellar eutectic during directional solidification, 73

Spacing selection
dynamics of spacing selection of a lamellar eutectic during directional solidification, 73
Spherical powders
experimental size ratio and compositional effects on the packing and hot isostatic pressing of spherical powders, 217
Stainless steel
mechanical properties of sintered austenitic stainless steel—effect of silicon addition, 145
Steels
carbide precipitation and the nucleation of allotriomorphic ferrite in a Fe–W–C steel, 101
the effects of rolling processes on the microstructure and mechanical properties of ultra low carbon bainitic steels, 29
Strain
calculation of creep and stress–strain behaviour in aluminium, 15
on the measurement of local strain and temperature during the formation of adiabatic shear bands, 195
planar slip and deformation-induced strain instabilities in cyclically deformed Al–Li single crystals, 161
strain concentration at grain boundaries in AlMgSi alloys, 1
Stress
calculation of creep and stress–strain behaviour in aluminium, 15
Superalloys
a study of precipitates and insolubles in a nickel–iron-base superalloy by analytical electron microscopy, 89
Superplasticity
a study of cavity nucleation during superplastic deformation of high strength aluminium alloy 7475, 37
superplastic forming: an analytical approach, 9

Thermal expansion
martensite precursor observations using thermal expansion: Ni–Al, 225
Thermostability
effects of purification on the glass forming ability and thermostability of Ni–B–Si metallic glass, 211
Trace elements
the effects of trace elements on the creep behaviour of a Ni–Cr-base alloy, 63
Tungsten
carbide precipitation and the nucleation of allotriomorphic ferrite in a Fe–W–C steel, 101
fracture toughness of W heavy metal alloys, 151
Twin boundaries
the role of annealing twin boundaries in the cyclic deformation of f.c.c. materials, 21

Zinc
effects of zinc content on the processing map for hot working of α brass. 43
hysteresis loop shape in fatigue of Cu–Zn alloys, 169
